

ALL THINGS L.E.D.

To Set Cloud Server information:

Click Setting, Cloud Server

A window will open up like below

The screenshot shows a software interface with a 'Cloud Server' window open. The window contains a table with columns for Name, ID, Server IP, Server Port, and User. Two entries are listed: 'P3-Office' and 'p4-Office'. Below the table, there is a text area showing successful server information retrieval for both IDs. At the bottom of the window, there are input fields for Server, Port, and Username, along with buttons for 'Fill Same', 'Refresh', 'Send', and 'Cancel'.

	Name	ID	Server IP	Server Port	User
1	<input checked="" type="checkbox"/> P3-Office	A602-1406-A1757	cloud.allthingsl...	80	test
2	<input checked="" type="checkbox"/> p4-Office	A602-1406-A1759	cloud.allthingsl...	80	test

A602-1406-A1757: Get server information successfully.
A602-1406-A1759: Get server information successfully.

Server: cloud.allthingsled.ca Port: 80 Username: test

Buttons: Fill Same, Refresh, Send, Cancel

ALL THINGS L.E.D.

At the Bottom it says Server: make it cloud.allthingsled.ca Port 80 put in your user name check off the name of your LED display then click Fill Same the click Send.
